Dear Mr. Gravatt,

Thank you for your email and your ending quote. I will call Debbie, tomorrow, so as not to bother you during travels.

My questions are pertaining to whether or not Westlake (Republic) will be building the "wall" with dirt, or, is the inert material something more impenetrable? If you think Debbie would not know the answer, my home phone on. Sorry to trouble you while traveling. 12:30pm-

Ex. 6 - Personal Privacy

Sincerely,

Ex. 6 - Personal Privacy

Ex. 6 - Personal Privacy I had asked Debbie Kring from our office of public affairs to get back to you as I am out of the office on travel this week. Apparently she has not done this yet. Please send me a telephone number, and I will call you to address your questions.

Sincerely,

Daniel R. Gravatt, PG

Dear Mr. Gravatt,

My name is Mary Ann Boenker, wife of Mark Boenker. The Boenker farm is located in St. Louis County next to the Bridgeton Landfill. I have been asked by the family to inquire on the latest developments regarding the excavation of an interceptor trench between North Quarry (Westlake) and South Quarry (Bridgeton landfill). Could you explain the trench and the proposed "wall". I believe the wall is meant to be a fire break for the two landfills, but, I do not understand the concept of a slurry wall or inert material that will be used for the wall. I talked with Larry Lyman, today, who gave me this information and mentioned that the EPA is overseeing the environmental safety of Westlake Landfill.

I would appreciate any information you could share with me and our family.
Gratefully,

Mary Ann Boenker
